

ABSTRACT OF THE DISCLOSURE

An information storage medium has a first playback unit (music number or tune) for playing back the audio information and a second playback unit (AOB) being more
5 fine than the first playback unit (music number), and one or more pieces of management information (AOBI) each pertaining to the second playback unit (AOB) are recorded in a line (arrangement sequence of AOBI# in music #). Display mode information indicating the
10 display method (display order/display sequence, display timing) of image information (IMG_xx.IOB) is described in management information (AOBI# in music #) recorded at the head position in the first playback unit (music number) of this management information (AOBI).
